

# Record Homebuilding Activity at Red Ledges

**RED LEDGES HAS BEEN A HOTBED OF CONSTRUCTION ACTIVITY THIS SUMMER.**

There are over 140 homes, cabins and cottages completed in the community, and that total should double in the next two years, as there are nearly 70 homes currently in active construction and 30 in the design process with Red Ledges' Architectural Review Committee (ARC). What a great testament to the community to see so many owners looking to build their dream homes at Red Ledges!

In order to manage that increased volume and to help owners get their homes built efficiently, the ARC has implemented some updates to their process. The starting point for that is the design and building checklist that can be found on the community's website, [here](#). The increased volume of activity has kept the ARC busy – so following the checklist helps them to help you.
